PROJECTS

LIVE DEV PORTFOLIO | MERN stack Project

Checkout **live project**. March 2024

- Built in using the **MERN** stack and **Tailwind CSS** , my portfolio website integrated with **Aceternity UI** components which Gives amazing look to it,also uses **React Fiber** for 3D animation.For State management uses **Redux Toolkit Query**
- Increased online visibility and received positive feedback from peers and industry professionals, leading to networking opportunities and collaboration requests.

ONELINK (LINKTREE CLONE) | MERN stack Project with Tailwind CSS and Redux Toolkit

Checkout **live project**. March 2024

- Onelink is a dynamic and user-friendly Linktree alternative built on the powerful **MERN** stack. It streamlines the process of sharing multiple links by providing a single, customizable landing page for all your important links. With Onelink,
- users can effortlessly showcase their online presence, whether it's social media profiles, portfolio websites, or business pages.
- Easily organize and manage all your links in one centralized location, allowing for seamless navigation for your audience.
- **Tailwind CSS** was utilized for intuitive UI design, while **Redux Toolkit** ensures efficient state management, enhancing the performance and scalability of the application.

CHATIFY | Web Socket Project

Checkout february 2024

- a cutting-edge chat application that seamlessly integrates the power of the **MERN** stack with the sleek and responsive UI design of **Tailwind CSS**, along with the real-time communication capabilities of **Socket.IO**.
- Engage in instant conversations with friends, colleagues, or groups through Chatify's real-time messaging feature powered by Socket.IO, fostering efficient communication and collaboration

UNPLASH IMAGE SEARCH APP | React.Js API Based Project with MERN Stack and Tailwind CSS

January 2023

- Designed and implemented an intuitive user interface using Tailwind CSS, allowing users to easily search for and download high-quality images from the Unsplash API.
- Integrated the Unsplash API with the MERN stack to retrieve image data, ensuring real-time search results and a seamless browsing experience.
