EDUCATION

I.M.S.I.T
AURANGABAD,
MCA | BAMU
Apr/May 2024 | India

L.P.P
AURANGABAD,
BCS | BAMU
Apr/May 2022 | India

VIVEKANAND COLLEGE
AURANGABAD,
12TH | HSC
Feb 2019 | India

S.B HIGH SCHOOL
AURANGABAD
10TH | SSC
March 2017 | India

EXPERIENCE

GALAXY FINTECH PVT. LTD. | Full Stack Developer

October 2024 – Present | Aurangabad, India

- Building and maintaining modular UIs using **Angular 19** and a **Micro Frontend** architecture for large-scale enterprise application.
- Designing and developing secure, scalable **RESTful APIs** with Node.js, integrating seamlessly with MongoDB.
- Collaborating cross-functionally with frontend teams to ensure smooth component integration and consistent performance.
- Leading backend improvements to enhance performance, scalability, and maintainability within a microservices-based architecture.

GALAXY FINTECH PVT. LTD. | MEAN Stack Intern

April 2024 – September 2024 | Aurangabad, India

- Learned and practiced core concepts of **Angular 18**, **Micro Frontend architecture**, and **Node.js** backend development.
- Applied internship training in real-time by contributing to live projects and implementing learned concepts in code.
- Gained experience in backend logic, database operations, and basic API development using **NodeJs** and **MongoDB**.
- Worked under mentorship to debug issues, test features, and understand scalable full-stack development workflows.

PROJECTS

LIVE DEV PORTFOLIO | MERN stack Project

Checkout **live project**. March 2024

- Built in using the **MERN** stack and **Tailwind CSS** , my portfolio website integrated with **Aceternity UI** components which Gives amazing look to it,also uses **React Fiber** for 3D animation.For State management uses **Redux Toolkit Query**
- Increased online visibility and received positive feedback from peers and industry professionals, leading to networking opportunities and collaboration requests.

ONELINK (LINKTREE CLONE) | MERN stack Project with Tailwind CSS and Redux Toolkit

Checkout **live project**. March 2024

- Onelink is a dynamic and user-friendly Linktree alternative built on the powerful **MERN** stack. It streamlines the process of sharing multiple links by providing a single, customizable landing page for all your important links. With Onelink,
- **Tailwind CSS** was utilized for intuitive UI design, while **Redux Toolkit** ensures efficient state management, enhancing the performance and scalability of the application.
